Rex Granite... we're not bigger, just better.

Rex Granite offers many of the same granite memorial manufacturing services that our larger competitors do, and many more than our smaller competitors. We cut our own blocks. We shape, craft, polish and engrave. We have an experienced in-house art department that offers a large carving library, scaled drawings, and stencil cutting. Do you want diamond etching, computer laser etching or sandblast carving? When it comes to crafting granite monuments and memorials, we can do it all; and we do it without causing you the frustration that sometimes happens when working with larger and smaller companies. Rex is just the right size. We offer the capabilities you need and the service you expect. We think you'll agree that bigger isn't always better. Better is better, and you can expect better service from Rex Granite.

Each monument starts with the granite block which we cut on our 10' diamond saw. We carry a large inventory of granite blocks which means we can fabricate and ship quickly.

Customers benefit from our start-to-finish capability and efficient production processes.

Each monument is hand crafted, paying special attention to detail. With Rex, quality is never compromised.

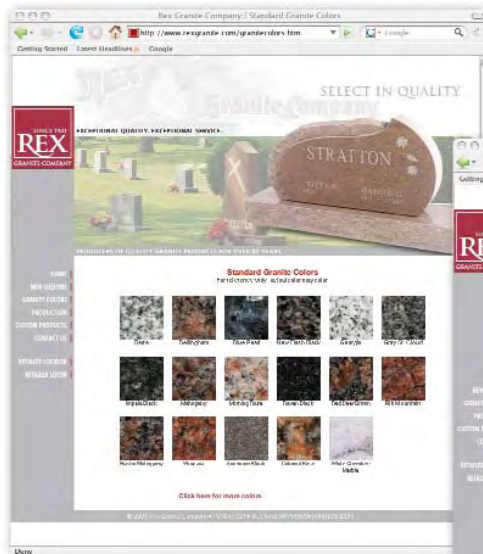

Rex is your one-stop memorial distributor. From our in-house art department and custom design capabilities to diamond etching, computer laser etching or sandblast carving, we can do it all... and we do it all in house.

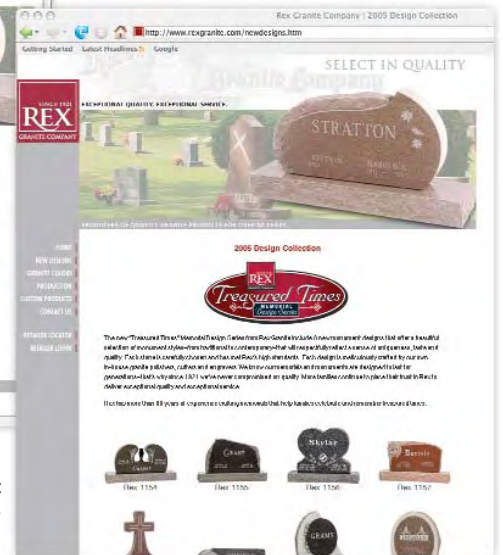

For over 80 years, Rex Granite has produced high-quality monuments and memorials. Our quality, service and attention to detail has helped us create customer relationships that have endured for many years.
